

# FACT SHEET COMMON TARIFF 3c

## TV broadcasts shown on giant screens for public viewing

Common Tariff 3c (CT 3c) applies to the simultaneous and unaltered showing of television broadcasts on large screens and projection surfaces of more than three metres in diagonal for public viewing outside the private sphere.

CT 3c also applies to the rights to perform or screen non-theatrical musical works and sound recordings and audiovisual recordings from the SWISSPERFORM repertoire which are used outside the private sphere and for a maximum total duration of one hour during breaks, before or after the simultaneous and unaltered showing of television broadcasts on large screens for public viewing outside the private sphere.

SUISA is the collective rights management organisation representing, and entrusted with collection on behalf of, SWISSPERFORM, ProLitteris, SSA and SUISSIMAGE.

### How is the pricing set for music use?

Remuneration depends on the size of the screen and the number of days of public viewing. Whether or not admission to the event is free of charge or a mark-up for drinks is applied is also taken into account. If the same broadcasts are shown on several large screen or projection surfaces at one and the same event, remuneration will only be due for the largest screen.

If you already pay a fee under CT 3a (for audiovisual use), it will be offset against this remuneration.
